

WE LEARN

5th Annual (Net) Working Gathering & Conference on Women & Literacy

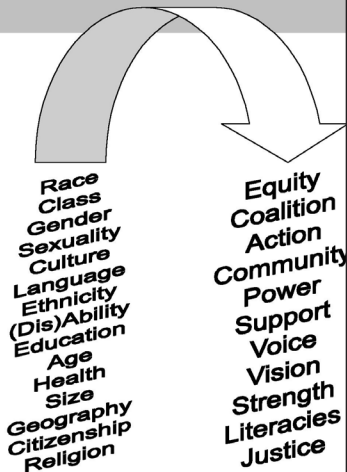

March 7-8, 2008

Fordham University at Lincoln Center
New York, NY

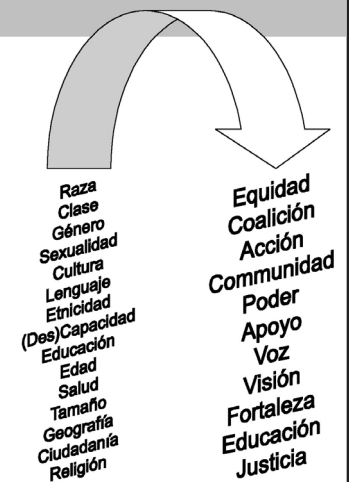

Co-Sponsored by WE LEARN with Fordham
University Graduate School of Education

Women continue to be separated by culture, language, literacy, geography; our differences are profound. The daily lives of women in adult basic/literacy education remain especially complex due to inequities based on race, class, gender, and other diversities. This year's conference will explore the differences that divide women and look to ways of building alliances across those differences.

Building Alliances

Construyendo Alianzas
